

Arnold Perlas

Senior Security Engineer | Vulnerability Management | Endpoint Security

Santa Ana, CA | perlasarnold@gmail.com | 714-351-6393 | linkedin.com/in/perlasarnold

SUMMARY

Senior security engineer with 13+ years securing enterprise infrastructure across 370+ locations, 300+ servers, and 5,000+ endpoints. Reduced more than 1 million vulnerabilities by 96%, cut a 30,000-finding backlog by 83% within 90 days, and maintained PCI and SOX patch compliance. Specializes in NIST CSF 2.0, vulnerability management, endpoint security, hardening, identity, and automated remediation.

CORE TECHNOLOGIES

- **Vulnerability Management:** Qualys, CrowdStrike, Microsoft Defender, Tanium, Automox, risk prioritization, remediation, patch compliance
- **Endpoint Security:** Microsoft Intune, Windows Autopilot, Windows 11, system hardening, security baselines, Check Point
- **Frameworks & Compliance:** NIST CSF 2.0, NIST-aligned controls, PCI, SOX, HIPAA, incident response, continuous monitoring
- **Identity & Cloud Security:** Azure, Entra ID, Active Directory, SAML, SSO, IAM, RBAC, PIM, Azure VMs
- **Security Automation & Infrastructure:** PowerShell, Python, Bash, Terraform, Ansible, Git, VMware, Windows Server, firewalls, VPN

PROFESSIONAL EXPERIENCE

Systems Engineer | Foundation Building Materials (FBM) / Lowe's | Mar 2026 - Present

- **NIST CSF 2.0 Assessment:** Served as owner and technical confirmer for controls spanning Asset Management, Risk Assessment, Platform Security, and Continuous Monitoring.
- **Vulnerability Remediation:** Coordinated remediation across acquired environments, clearing approximately 90% of newly identified vulnerabilities within required compliance windows.
- **AI Governance:** Established processes to identify and investigate enterprise AI tool usage and strengthen organizational safeguards.
- **Security Resilience:** Implemented and validated backup controls for servers and workstations and built trigger-based restore and remediation workflows.

Systems Administrator, Security Operations | Foundation Building Materials (FBM) / Lowe's | Jan 2024 - Mar 2026

- **Enterprise Remediation:** Led remediation of more than 1 million detected vulnerabilities, achieving a 96% reduction within 12 months as the primary engineer.
- **Vulnerability Reduction:** Reduced the enterprise backlog by 83% within 90 days, from 30,000 findings to fewer than 5,000, through standardized hardening controls.
- **Compliance & Patching:** Spearheaded centralized patching for endpoints and Azure VMs, achieving and maintaining 100% compliance with PCI and SOX standards.
- **Security Platform Deployment:** Deployed Qualys, Tanium, Microsoft Intune, Windows Autopilot, Check Point, and CrowdStrike across globally distributed locations; created one-click fixes and automated remediation.
- **M&A Security Integration:** Served as technical lead and product-owner liaison while standardizing security configurations across 30+ acquired organizations.

IT Administrator / Lead Endpoint Administrator | Foundation Building Materials | Jan 2018 - Jan 2024

- **Endpoint Security Controls:** Engineered and enforced 100+ NIST-aligned policies across 300+ servers and 5,000+ endpoints and migrated the endpoint estate to Windows 11.
- **Secure Endpoint Management:** Led zero-touch Microsoft Intune and Windows Autopilot deployment for more than 5,000 devices supporting remote and local staff.
- **Hybrid Infrastructure Security:** Modernized 370+ locations by migrating VMware workloads to Azure and Entra ID and integrating acquired sites into standard controls.
- **Automated Detection & Remediation:** Built PowerShell automation for operations, alerting, compliance, and remediation and standardized network security across acquired locations.

IT Field Engineer | Synoptek | Jan 2014 - Jan 2018

- **Security Monitoring:** Managed infrastructure for 100+ client organizations and introduced monitoring that reduced service interruptions by more than 50%.
- **Systems Security:** Administered Windows servers, Dell and HP hardware, VMware, and Hyper-V across diverse managed-service environments.
- **Recovery Controls:** Implemented backup and recovery using Veeam, Symantec, and Barracuda to protect data integrity and operational continuity.

IT Help Desk | WorkCare | 2013 - 2014

- **HIPAA Support:** Built knowledge-base articles and operating procedures that improved first-call resolution and supported continued HIPAA compliance.
- **Technical Support:** Resolved hardware and software issues for remote and local users while maintaining service-level expectations.

EDUCATION

Bachelor of Science in Pharmacy | University of Santo Tomas | Manila, Philippines
